Responsibly Sourced Materials

As a leading manufacturer of home goods, we're committed to using responsibly sourced materials, and considering our climate footprint. We are constantly developing new designs for products made from recycled materials. Each year we are increasing the number of products that are made of recycled plastic. However, there are some restrictions when doing so, but we strive to use recyclable materials wherever it is possible, without compromising the functionality or quality of the products.

Furthermore, both cardboard packaging and our wooden items are FSC certified meaning they come from responsibly managed forests. Apart from this we use other sustainable materials, like plant fibers such as Seagrass, Water Hyacinth, Rattan, Bamboo, Palm Leaf, and Husk Corn Leaf. Compostable and biodegradable, these resources make a perfect eco-friendly material for our basket designs.

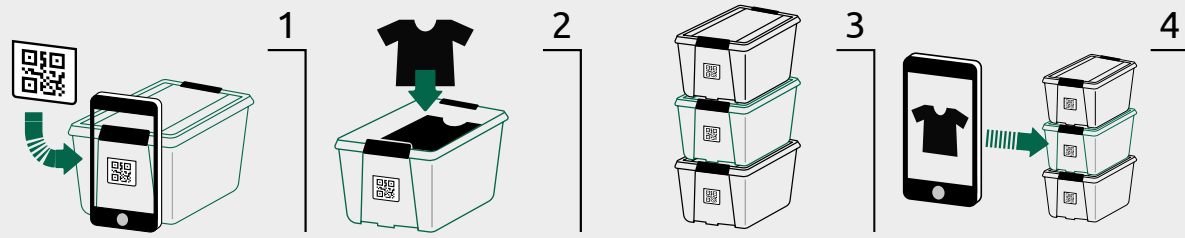

Innovative Design

Our products are designed to be easily disassembled and reused. Thanks to their modular design, they can be dismantled, separated into various plastic materials, and recycled.

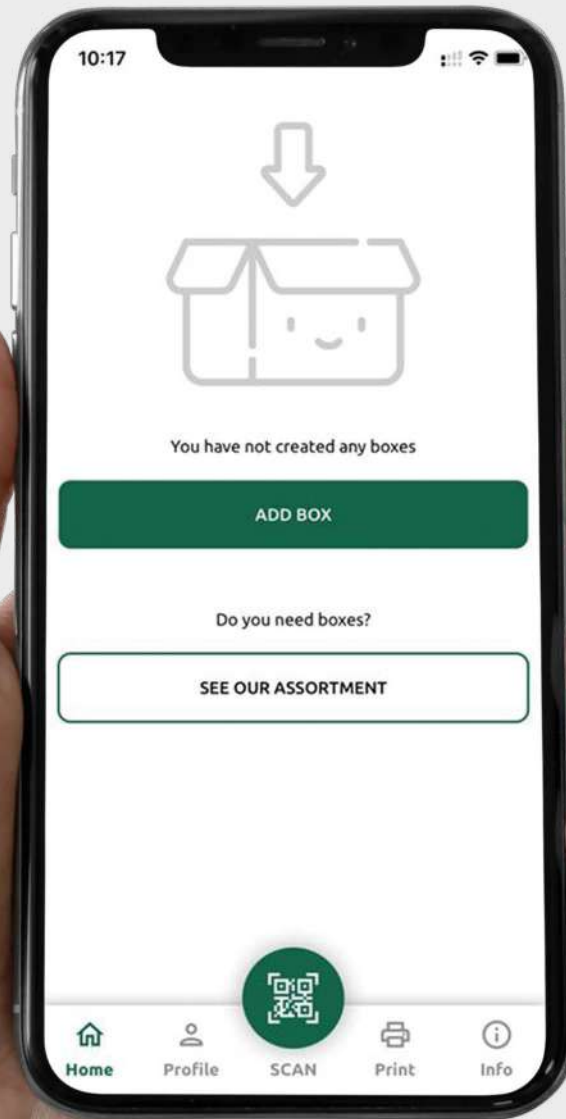

A Greener Future

We highly encourage our customers to reuse or recycle our products whenever possible to contribute to a greener environment and minimize resource waste. Our goal is to make it easy to recycle our products. We're aiming towards creating a more circular economy, where the lifecycle of a product is endless.
